- ✓ 2" aluminum voice coil
- ✓ Nomex™ red spider

DSK 572.1

2-way 130mm or 5.25",
120W RMS, 240W peak

DSK 672.1

2-way 165mm or 6.5",
160W RMS, 320W peak

The two-way DSK systems are the expression of a project where power and quality are in pole position. The mobile aluminium 50mm (2") voice coil, the large, ultra-straight magnetic circuit and the hard polypropylene cone loaded with graphite make musical reproduction extremely accurate and also provide a maximum SPL that is typical of much larger loudspeakers. The unusual ability to reproduce low frequencies allows the musical signal to be reproduced in an exceptionally realistic way, with high emotional impact. The best choice for car hi-fi competitions and for anyone who wants sound at high volume while maintaining excellent quality. The kit includes the tweeter DTH 125.2, a High End linear phase passive filter, grilles and assembly components.
